ELECTION/RESTRICTIONS

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to an apparatus for anchoring or retaining a well tool, classified in class 166, subclass 206.
 - II. Claim 12, drawn to an apparatus for cutting an aperture in an existing cased borehole, classified in class 166, subclass 55.
 - III. Claim 13, drawn to an apparatus for transporting well tools, classified in class 175, subclass 92.
 - IV. Claim 14, drawn to an apparatus for performing interventions in a borehole, classified in class 166, subclass 243.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III, and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the different combinations could be used with an anchoring or retaining mechanism. The subcombination has separate utility such as being used with any wellbore tool and in any wellbore operation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Collin Rose on 24 March 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
